

Complete stencil cutting systems in your choice of three different widths

AirMark Stencil Cutting Systems merge the latest in computer-aided design and production equipment to allow you to create aircraft paint stencils that meet the highest performance standards. Our cutters offer best-in-class speed, accuracy and durability. Our stencil materials perform to the highest industry standards for reliability, crisp painted edges and clean removability, even when baked in drying ovens. With three sizes and the choice of individual components or complete turnkey systems, AirMark offers solutions for aircraft painters of every size and capability.

CUT

AirMark Stencil Systems

30-inch | 48-inch | 64-inch

30" System Price: **\$13,495**

48" System Price: **\$15,995**

64" System Price: **\$17,995**

Workstation Highlights

- Fully-loaded Intel Core 2 Duo / Windows Vista Dell PC
- CorelDRAW X3 or Illustrator CS2 and Photoshop CS2
- CoCut Professional Multi-Tool plug-in for Corel and Illustrator
- On-site set up and training included at no additional cost

Cutter Highlights:

- TrueTangential cutting head for ultra precise cutting
- Front and rear media baskets for long unattended cutting
- Duo-function cutting head for cut-and-draw applications
- Touch-sensitive LCD controls for maximum ease-of-use

AirMark Stencil Systems

Turnkey 30-Inch, 48-inch or 60-inch Stencil Cutter Systems

The ultimate in cut-quality

If you've ever been ready with paint in hand only to have a stencil fail to lift off correctly, then you'll truly appreciate our TrueTangential™ cutting. With a motorized cutting head that turns the blade mechanically, AirMark Stencil Cutters are able to lift and turn on every angled cut. That assures every corner is cut completely and precisely. And it means every stencil pulls up quickly and cleanly, no matter how complex. In fact, AirMark Stencil Cutters are the only cutters of their type to offer tangential cutting, which is the same cutting method found on large and ultra-expensive flatbed cutters.

Unparallel long-track accuracy

Even personal aircraft can have large surface areas you'll need to mask before painting. So a stencil cutter that maintains its accuracy on long runs can spell the difference between success and failure. That's why every AirMark Stencil Cutter has our patented and exclusive MicroSprocket™ tracking system. They're so accurate we guarantee your cuts will be within a 4/1000ths-inch margin of error, even on cuts up to 40 feet in length. You'll never waste time and materials with inaccurate cutting. With an AirMark Stencil Cutter, accuracy is guaranteed.

Dizzying speed

Whether you're cutting a single stencil or thousands, you'll enjoy the time-saving speed and increased production that AirMark Stencil Cutters deliver. All three models combine our super-accurate MicroSprocket tracking with three robust servomotors that move the cutting head and material at top-in-class speeds. So you can take full advantage of the 56-inch-per-second cutting and know your stencils will be perfectly-cut every time.

Easier than ever

Gone are the days of complicated and confusing character-based displays. AirMark Stencil Cutters feature large graphical touch-screen control panels that guide you through every feature and setting with a touch of your finger. Change every setting and advanced feature quickly and intuitively — even the language of the on-screen prompts and buttons. So you don't even need to speak English to be amazed by the incredible ease-of-use.

Celebrating 15 Years of
Worldwide Leadership

The preferred stencil and labeling solutions for the aircraft painting industry since 1992

Workstation Specifications

WORKSTATION: Dell Precision 390

PROCESSOR: Intel® Core™ 2 Duo E6300 1.86GHz/1066MHz/2MB L2/Dual-core/VT 318T2

OPERATING SYSTEM: Windows Vista™ Business

GRAPHICS CARD: 128MB PCIe x16 nVidia Quadro NVS 285, Dual DVI or Dual VGA Capable

RAM: 2GB, 667MHz, DDR2 SDRAM Memory, ECC (2 DIMMS)

CD/DVD DRIVE: 16X DVD-ROM with Cyberlink Power DVD™ for Vista Business

HARD DRIVE: 320GB SATA 3.0Gb/s with NCQ and 16MB DataBurst Cache™

MONITOR: Dell 20 inch E207FP Widescreen Flat Panel

KEYBOARD: USB Entry Quietkey

MOUSE: Dell USB 2-Button Mechanical Mouse with Scroll

INSTALLED SOFTWARE:

☐ McAfee SecurityCenter 30 Day Trial

☐ CorelDRAW X3 Graphics Suite or Illustrator CS2

☐ Adobe Photoshop CS2

☐ CoCut Professional Multi-Tool plug-in for CorelDRAW and Illustrator

SERVICE PLAN: 3 Year On-site
